DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ricoh (JP 57-189142) in view of Ono (5,389,480). Ricoh teaches an organophotoreceptor with a charge transport material containing a similar heterocyclic group as represented by Z in the instant formula of the claims. Ono (col. 3-9) teaches similar organophotoreceptor with a charge transport material containing substituted linking groups. It would have been obvious to one of ordinary skill in the art to use the substitution taught by Ono in the charge transport material of Ricoh because of the similarities in charge transport materials used for the same intended purpose in organophotoreceptors and the expectation of similar known results and effect of organophotoreceptors and related applications.
